CALL FOR PAPERS - Your contribution to the Users Group Meeting

Users from all backgrounds (e.g. Consultancies, Public Sector, and Universities) are encouraged to submit abstracts for presentations on topics related to PTV Vision VISSIM or VISUM applications.

If you have applied VISSIM or VISUM (or tools linked to these) to any problem that could be of interest to other participants, please get in touch with us.

We will need to have a title accompanied by an **abstract** of 200-300 words by **April 30th 2010**.

Presenters should then submit their **papers and/or handout slides** by **May 15th 2010**.

The compliance with these deadlines will enable us to prepare the documentation to be circulated at the User Group Meeting well in advance (papers and/or handout slides not received on time might not be part of the proceedings and/or excluded from the programme). **Presentations** will last **15-25 minutes**, with some time for questions at the end.

This year one lucky author wins "Best Abstract" and receives free attendance at UGM!
